Professional Summary

Results-driven Data Analyst skilled in Python, SQL, Power BI, and Tableau. Experienced in data visualization, EDA, and ETL to uncover insights and optimize business strategies. Certified in Data Analysis and Visualization, committed to data-driven decision-making.

Technical Skills

Languages And Databases: Python, SQL, Pandas, Numpy

Visualization Tools: Matplotlib, Seaborn, Tableau, Power BI (DAX Queries)

Technologies/Frameworks: Advanced Excel, Business Analysis, Data Analysis, Data Cleaning, Data Visualization, ETL Process, WordPress, Streamlit

Education

Academy Europe Open University

Master of Business Administration (MBA)

2022 – 2024

European Open Online University

Bharti Vidyapeeth Pune

Bachelor of Computer Applications (BCA)

2018 – 2021

Karad, Maharashtra

Certifications

- Analyzing, Visualizing Data with Power BI - Top Mentor
- Career Essentials in Data Analysis - Microsoft
- Data Visualization Using Python - IBM
- ML And Data Analytics - Infosys Springboard
- Python for Data Science - IBM
- Data Visualisation: Empowering Business - Tata Group

Work Experience

Access Million

Data Analysis Intern – Marketing Department

March 2024 – September 2024

Pune, Maharashtra

- Created interactive dashboards with Excel, Python, and Power BI to analyze marketing data and uncover valuable insights through exploratory data analysis (EDA) and statistical techniques.
- Automated workflows with Python, reducing manual effort by 20 Percent and increasing lead conversions by 15 Percent

Finmech Business Services

Customer Care Executive - PL

December 2023 – June 2024

Navi Mumbai, Maharashtra

- Assisted clients with personal loan inquiries and applications, providing tailored support. Efficiently managed customer records and resolved issues promptly to ensure high satisfaction levels.
- Collaborated with teams to optimize loan processes and provide tailored solutions, enhancing customer satisfaction

Projects

Virat Kohli Performance Metrics – Data Visualization in Power BI

November 2024

- In-depth analysis of Virat Kohli's batting performance, including runs scored, strike rates, averages, and match comparisons across various formats (ODI, Test, T20I).
- Interactive filters and slicers allow users to explore data by year, format, opponent, and venue.

New York City Airbnb Homestays Data – Python, Pandas, Numpy, Matplotlib, Seaborn, EDA

October 2024

- Performed data cleaning to resolve issues such as missing values, duplicates, and inaccuracies, ensuring data accuracy and reliability for analysis while leveraging key skills like Data Analysis.
- Conducted EDA and visualized trends using Matplotlib and Seaborn.

Olympic Data Analytic Project – Power BI

December 2024

- Performed data manipulation, cleaning, and preprocessing to enhance data quality.
- Conducted exploratory data analysis (EDA) using Power BI to uncover insights into Olympic history, identify trends, and evaluate performance metrics, showcasing expertise in Data Analysis and visualization.

Strengths/Soft Skills

- Good learner by Observation
- Proficient in Data Analysis and Visualization Tools
- Strong Problem-solving skills And Analytical Skills
- Communication And Business Oriented Mindset
- Team Management And Project Management
- Presentation, Storytelling And Leadership
